

Report: Skiing trip

Introduction

The aim of this report is to describe this year's skiing trip to Zell am See and to make recommendations for next year's journey. This report is based on a survey for which 30 students were asked.

Accommodation

The majority of students liked the food. There was plenty of it and it tasted good.

However, 80% of the pupils said that the rooms were too small and there were not enough cupboards. Therefore there was not enough room to put away clothes and so many things were lying around. Furthermore the mattresses were very bad and uncomfortable.

Moreover it was criticized that no soft drinks were included in meals thus the students had to spend more money than expected.

Activities

Most students mentioned that they liked the skiing very much. There was a great variety of excellent slopes and we had enough time for skiing. However, there were not enough activities in the evening.

Organisation

The trip was well organised and the teachers were friendly and helpful.

Recommendations

It would be a good idea to look for a better hotel whose rooms are more spacious and whose beds are more comfortable. It is advisable that the hotel offers tap water with the meals.

Furthermore I recommend providing more activities in the evening so that students do not have to watch TV all the time. To sum up the skiing trip was a great success.
